PRESENTATION OF REQUEST FOR SUPPORT

1. Discussion: This special meeting was called to consider the request for support presented informally by Willis B. Foster of the Department of Defense, Research and Engineering (formal request proceeding through channels, see attached letter). He requests certain information on or before 15 May 1958 concerning research and development activities in the Soviet Arctic. Information supplied can include material up to Top Secret.

Mr. Foster elaborated upon the specific items in the request and answered questions posed by members of the Group. He stated that this was not a request for research to be undertaken but merely a request for already available information.

2. Action: The Group agreed to study the request but made no other commitments. After Mr. Foster's departure the Group discussed the request at length and decided that some but not all of the requested information can be supplied within the specified time. Individual members of the Group were designated to study specific sections of the request and prepare tentative replies for consideration at a meeting of the Group to be held at 1400, 9 May 1958.
